**Vortek Surgical Announces Partnership with MMS for
Distribution of Colonoscopy Draping Product**

Indianapolis, IN (April 14, 2008) – Vortek Surgical announced today that it has partnered with MMS Medical (www.MMSMedical.com) as a distributor for the ENDODRAPE™ Colonoscopy Draping System.

The distribution partnership provides current ENDODRAPE™ customers the option of including the Colonoscopy Drape in regular MMS order cycles. Included in the partnership is the Vortek Surgical Preferred Pricing Program for qualified MMS customers.

As a practical solution to the risks of environmental contamination and cross transmission during colonoscopy procedures, the ENDODRAPE™ strengthens the MMS mission to serve specialized needs of the medical community. The ENDODRAPE™ offers a comprehensive Zone of Protection to guard patients, staff, and equipment from exposure to bacteria and contamination during colonoscopies. It also saves time and money by improving procedural efficiency, reducing procedure room turn times and decreasing the risk of contamination spread to patients and staff in the recovery area and throughout the facility.

“Our partnership with MMS is an ideal match. Both companies share an uncommon commitment to addressing the current needs in patient care. The ENDODRAPE™ Brand team is prepared to leverage the proven expertise and national presence of MMS in order to enhance the availability of our Colonoscopy Draping System,” said Phil Daniels, Director of Marketing at Vortek Surgical.

About Vortek Surgical

Vortek Surgical (www.vorteksurgical.com) is a specialty medical company dedicated to the development and commercialization of innovative medical devices and surgical products. Based in Indianapolis, Vortek is committed to offering products and educational resources to advance the safe and efficient delivery of patient care in an ever-changing environment. Products include the ENDODRAPE™ Colonoscopy Draping System, which provides a cleaner, safer, and cost effective solution to infection control and time management concerns in endoscopy.
